## 1. Assessment Summary

The following table only contains significant obligations, restrictions & risks for a quick overview – all obligations, restrictions & risks according to Section 3 must be considered.

General assessment	NA
Source / binary integration notes	no critical files found, source code and binaries can be used as is  critical files found, source code needs to be adapted and binaries possibly re-built
Dependency notes	no dependencies found, neither in source code nor in binaries  dependencies found in source code (see obligations)  dependencies found in binaries (see obligations)
Export restrictions by copyright	no export restrictions found

owner	export restrictions found (see obligations)
Restrictions for use (e.g. not for Nuclear Power) by copyright owner	no restrictions for use found restrictions for use found (see obligations)
Additional notes	NA
General Risks (optional)	NA

## 2.Required license compliance tasks

### 2.1. Common obligations, restrictions and risks:

There is a list of common rules which was defined to simplify the To-Dos for development and distribution. The following list contains rules for development, and distribution which must always be followed!

2.1 .1	Documentation of license conditions and copyright notices in product documentation (License Notice File / README_OSS) is provided by this component clearing report:
2.1 .2	Additional Common Obligations: Need to be ensured by the distributing party:
2.1 .3	Obligations and risk assessment regarding distribution

### 2.2. Additional obligations, restrictions & risks beyond common rules

This chapter contains all obligations in addition to “common obligations, restrictions and risks” (common rules) of included OSS licenses (need to get added manually during component clearing process).

Obligation	License	License section reference and short Description

## 4.Export Restrictions

# FOSSology

The content of this paragraph is not the result of the evaluation of the export control experts (the ECCN). It contains information found by the scanner which shall be taken in consideration by the export control experts during the evaluation process. If the scanner identifies an ECCN it will be listed here. (NOTE: The ECCN is seen as an attribute of the component release and thus it shall be present in the component catalogue. ## 5. Notes

Only such source code of this component may be used-

- o which has been checked by and obtained via the Clearing Center or
- o which has been submitted to Clearing Support to be checked

Other source code or binaries from the Internet **must not be used.**

The following chapters are generated by the source code scanner.
